⍟ AlienPing Intergalactic Currency (AlienPing) – White Paper ⍟

Welcome to the future of meme coins, where trust, community, and cosmic vibes reign supreme! AlienPing is here to filter out scams and shine a light on real builders. Ready to join the ALIENBULLS? Let's blast off!

⍟ 1. Project Overview ⍟

AlienPing is a **meme-powered intergalactic currency** and crypto community built to resist the shallow hype cycles and rug-pull culture plaguing Telegram trendings. In a space where paying for visibility is easy — and often dangerous — *AlienPing flips the model*. Projects don't just buy their way into the spotlight; they **earn it**.

Why We're Different:

- - Before any project gets the *AlienPing Trending Green Signal* ⍟ , it faces a **human-powered verification process**:

- Checking **real holders** for organic distribution.

- Validating **whitepaper integrity** and **roadmap feasibility**.

- Ensuring **significant token vesting** and **transparent developers**.

- Confirming an **engaged community** that's not just bots or shills.

- - This process takes **days**, naturally filtering out low-effort scams before we dig deeper.
- - AlienPing is a **meme coin with meaning**, spotlighting real builders and saying "nope" to quick-flip scams.

Our Community: A blend of humor and integrity, welcoming alien fanatics and serious creators tired of pump-and-dump nonsense. If you're building something that matters — or just love aliens — *welcome home*.

⍟ 2. Vision & Mission ☐

Vision: To become the **universal seal of credibility** in the meme coin space, where AlienPing isn't just a token but a *signal of trust* for real, fun, and community-approved projects.

Mission: Protect degens from lazy rugs by setting a **new standard** for Telegram-based promotions. Our *community-vetted Trending Green Signal system* highlights:

- - **Real builders** with purpose.
- - **Solid holders** who believe in the project.
- - Backed by a **rigorous vetting process** ensuring *significant token vesting*, *developer transparency*, and *community legitimacy*.

⍰ 3. The Problem & Market Opportunity ⍰

The Problem: Today's meme coin world is a wild west of **paid trendings**. Projects buy visibility with **no vetting**, leading to:

- - Fast rug pulls.
- - Shattered trust.
- - Degens left holding empty bags.

The Opportunity: As meme coins grow, so does the need for **real filtering**. AlienPing creates *community-vetted trendings*, helping degens discover **legit projects** in a sea of scams.

⍰ 4. The Solution ⍰

AlienPing enforces a **rigorous manual review process** to ensure only credible projects earn the *Trending Green Signal*. Our vetting system is no joke — here's what projects must prove:

- - **Significant Token Vesting**   : A substantial portion of the token supply must be locked in vesting contracts to show **long-term commitment** and deter quick exits.
- - **Transparent Developers**   : Owners must engage openly, providing **clear communication** and **verifiable identities** or track records.
- - **Vetted Holders, Whitepaper, and Community**   :

- **Holder distribution** checked for manipulation (no whale dumps!).

- **Whitepaper** scrutinized for clarity and feasibility.

- **Community** evaluated for active, genuine engagement.

This process takes **several days**, acting as a **natural filter** to weed out low-quality *"bullshit coins"* that can't handle the heat.   Only projects that pass get our **wallet address** for payment in AlienPing tokens. Those who make it earn the *Trending Green Signal*, signaling **trust and quality** to our community. ⬚

⬚ 5. Token Utility ⬚

AlienPing is the **fuel of our intergalactic platform**, powering everything from trending access to community rewards. Here's how it works:

- - **Project Exposure**: Projects pay in AlienPing for trending.

- **50% of tokens received are burned**   , reducing circulating supply and enhancing value over time. This *deflationary mechanism* increases AlienPing's scarcity, benefiting long-term holders by supporting value appreciation.

- The remaining **50%** is allocated to **marketing**, **platform development**, and **ecosystem needs** to fuel growth and engagement.

- - **Holder Perks**: Holders get access to:

- **Airdrops** for early supporters.

- **Meme contests** for fun and rewards.

- **Potential governance roles** in the future.

⬚ 6. Tokenomics ⬚

Total Supply: **1,000,000,000 AlienPing**

Launch: 100% launched on either **Pump.fun** or **Moonshot** (Solana). Dev buys up to **20%** and segments it into **vested smart contracts**:

- - **0.05% (10,000 coins each)**

- For the **Top 50 Members** who make the list during pre-launch.

- Airdropped after all other supply is vested.

- Requires **extreme activity** on X (mandatory) and elsewhere — earned through **passion and grind**, not paid rewards.

- - **2.5% for Mod Incentives** 🛡️

- **96-month vesting period**

- ~260,417 coins/month or ~8,681/day

- Rewards **long-term commitment** from trusted community leaders.

- - **2.5% for Marketing**

- **60-month vesting period**

- ~416,667 coins/month or ~13,889/day

- Main source of early marketing, supplemented by the **50% of AlienPing tokens** (post-burn) from projects.

- Unused funds re-vested into **Community Rewards** monthly for transparency.

- - **2.15% for Community Rewards**

- **96-month vesting period**

- ~223,958 coins/month or ~7,465/day

- Used for random, weekly, or monthly **contests**.

- Scales with growth to reward **real ALIENBULLS**, not hoarders.

- - **12.8% for General Dev Allocation**

- **180-month vesting period**

- ~711,111 coins/month or ~23,704/day

- Supports **development**, **operations**, **hires**, **upgrades**, and **ecosystem needs** as AlienPing grows.

Token Burn Mechanism :

- - When projects pay in AlienPing, **50% of tokens are permanently burned**, reducing circulating supply and supporting long-term value.
- - The remaining **50%** funds **marketing**, **development**, and **ecosystem needs**, with **monthly transparent reports**.

Transparency Note:

- - **Unused tokens** from any contract are re-vested monthly into **Community Rewards**:

- **Short-term** (12–36 months) for contests and airdrops.

- **Long-term** (60–180 months) for AlienPing's decades-long vision.

- - Re-vesting decisions are **communicated monthly** to the community.
- - All contracts are **public**, vested, and tracked on **Solana's blockchain**, with a **public dashboard** planned for Phase 3.

▯ 7. Roadmap ▯

▯ Phase 1: Pre-Launch & Foundation
- - **Stealth build**: Telegram, X, website, and social media platforms.
- - **Mod structure**: Trusted, engaged contributors.
- - **Community growth**: 50–100 daily active members, not just reward-chasers.

- Top 50 contributors get **10,000 AlienPing airdrops** for *BULLISH* pre-launch support.

- - **Whitepaper deployed**: 24–48 hours before launch.
- - **Official launch**: Blast off!
- - **Smart contracts**: Vesting for Dev, Mods, Marketing, and Community wallets.

▯ Phase 2: Trend Filtering Begins
- - Rollout *Trending Green Signal* system.
- - Approve first projects.
- - Launch **meme contests** and **giveaways**.

▯ Phase 3: Growth & Utility
- - Launch **public "Trend Radar" page**.

- Drop **NFTs**, role rewards, and start **DEX talks**.

⬚ Phase 4: Expansion
- - Introduce **DAO-lite voting** for reviews.
- - Launch **public transparency dashboard**.
- - **Cross-promo** with vetted partners.
- - Host the *Intergalactic AlienPing Council*, a milestone-driven gathering for:

- **Anti-scam strategies**.

- **Ecosystem expansion**.

- Funded by **liquidity pool rewards**, **dev supply sales**, and **market cap milestones**.

⬚ 8. Team & Advisors ⬚⬚

- - **The Dev**   : Mastermind behind contracts, reviews, and funding structure.
- - **Mods** ⬚⬚: Trusted community leaders, rewarded via vested contracts.
- - **Signal Agents**   : Future role for vetting projects.
- - **Partners**   : Vetted collaborations (e.g., Skeleton/WTF Trending).

- AlienPing is the **final boss** of deep reviews — only serious builders pass!

⬚ 9. Tech Overview ⬚

- - **Built on Solana**: Fast, scalable, and transparent.
- - **No pre-mint or insider access**: Fair launch for all.
- - **Dev Wallet**: Split into **4 vested contracts**.
- - **Future Plans**:

- **Public dashboard** to track vesting schedules.

- **DAO-lite voting**, **NFTs**, and **metadata** for verified projects. ⬚⬚

⬚ 10. Community & Governance ⬚

AlienPing rewards **engaged holders**. Mods and Signal Agents earn trust through action. **DAO-lite voting** lets the community shape:

- - Approving *Trending Green Signal* projects.
- - Allocating **marketing funds**.

- - Prioritizing **ecosystem campaigns**.

Our **24-year-old founder**'s **15-year Dev vesting**, reduced airdrops to *true ALIENBULLS*, and **monthly re-vesting** into Community Rewards ensure a **transparent, community-driven ecosystem** built for decades.

⍰ Intergalactic AlienPing Council ⍰

AlienPing is a **movement** to protect crypto enthusiasts from scams and build a trusted ecosystem. We'll host *Intergalactic AlienPing Councils* to:

- - Unite **holders**, **newcomers**, and **visionaries**.
- - Discuss **anti-scam strategies**, **ecosystem growth**, and **progress**.
- - **High holders** get perks (e.g., priority speaking roles, exclusive sessions).
- - **All ALIENBULLS** and newcomers are welcome to join the fight against rug pulls. ⍰⍰
- - Funded by **liquidity pool rewards** and **dev supply sales**, with **virtual access** for global participation.

⍰ 11. Legal & Disclaimers

- - AlienPing is **not a financial product**.
- - **No guarantee of returns** — participate at your own risk.
- - **Regional compliance**: Consult legal advisors.
- - **Transparency**: All smart contracts are **verifiable**, and funds are used to grow and protect the ecosystem. ⍰

*Join the AlienPing revolution and help us redefine trust in the meme coin universe! Are you an ALIENBULL? Let's make the cosmos scam-free together! *
